**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

# **PART B - FEE(S) TRANSMITTAL**

**Complete and send this form, together with applicable fee(s), to:** **Mail** **Mail Stop ISSUE FEE**  
**Commissioner for Patents**  
**P.O. Box 1450**  
**Alexandria, Virginia 22313-1450**  
**or Fax** **(571)-273-2885**

**INSTRUCTIONS:** This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 5 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Use Block 1 for any change of address)

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

## **Certificate of Mailing or Transmission**

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO (571) 273-2885, on the date indicated below.

## Determination of Patent Term Adjustment under 35 U.S.C. 154 (b) (application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 951 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 951 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) WEB site (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

## **DETAILED ACTION**

### ***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance: Claims 1-3, 8, 11-13 has been rejected, and claims 16-32 were allowed. As indicated in the previous office action mailed 04/01/08, in response to the office action, applicant's amendment's and remarks filed on 10/01/08, a have been carefully received and respectfully considered.

Further, in view of applicant's remarks regarding the reference used to reject the application as discussed on pages 12-15, the distinction is patentably clear between the prior art and the claimed invention. Applicant's arguments with regard to the rejected claims 1-3, 8 and 11-13 has been found persuasive and the rejection has been withdrawn. Up on further review, Examiner has updated the search and has not found a prior art that read on the claimed invention as set forth in claim 1, 16 and 21, and therefore, the all pending claims are allowed for the reason discussed below:

With respect to claims 1-15, the prior art searched and of the record neither anticipates or suggests a method of computing a linearity profile to compensate for scan line velocity nonlinearity in an electro-photographic device comprising: obtaining a plurality of laser beam position measurements; assigning a first insertion time; assigning a second insertion time; and performing for a plurality of Pel locations along a laser beam scan path: determining an ideal Pel location based upon a desired

correction resolution; computing a first postulated position based upon said first insertion time and select ones of said plurality of measurements; computing a second postulated position based upon said second insertion time and select ones of said plurality of measurements; and storing a correction value corresponding to a select one of said first and second postulated positions that is closest to said ideal Pel location.

Clams 16-20, have been allowed for the reason the prior art searched and of record neither anticipates or suggests a method of computing a linearity profile to compensate for scan line velocity nonlinearity in an electro-photographic device comprising: obtaining a plurality of laser beam position measurement comprising a plurality of test points that measure for each test point, a scan direction position and a corresponding time value; initializing an accumulated angle; computing an initial scan direction position based upon said starting accumulated angle; assigning a first insertion time; assigning a second insertion time; and performing for a plurality of Pel locations along a laser beam scan path: determining an ideal scan direction Pel location based upon a predetermined correction resolution; computing a first postulated angle based upon said first insertion time and said accumulated angle; converting said first postulated angle to a first postulated position based upon select ones of said plurality of measurements; computing a second postulated angle based upon said second insertion time and said accumulated angle; converting said second postulated angle to a second postulated position based upon select ones of said plurality of measurements; comparing said ideal scan direction Pel location to said first and second postulated positions; storing a correction value corresponding to a select one of said first and

second postulated positions that is minimizes an error computation relative to said ideal scan direction Pel location; and updating said accumulated angle to said first postulated angle if said first postulated position results in less error than said second postulated position, and updating said accumulated angle to said second postulated angle if said second postulated position results in less error than said first postulated position.

Clams 21-32, have been allowed for the reason the prior art searched and of record neither anticipates or suggests a laser beam scan line velocity linearity registration system comprising: a slice clock operatively configured to output slice clock pulses having a fixed frequency; a pel clock generator programmably configured to generate pel clock pulses based upon said slice clock pulses and correction values input thereto; a pel clock counter communicably coupled to said pel clock generator, said pel clock counter operatively configured to determine a count value corresponding to a count of pel clock pulses; a linearity table having stored therein, a plurality of correction values, said linearity table communicably coupled to said pel clock counter and said pel clock generator such that an associated one of said correction values is selected from said linearity table based upon said count value from said pel clock counter and is communicated to said pel clock generator, wherein a duration of a corresponding pel clock pulse is determined from said correction value; and a video unit arranged to communicate Pels to a corresponding laser beam, said video unit coupled to said slice clock and said pel clock, wherein a duration of each Pel is determined by said slice clock, and spacing between Pels is determined by said pel clock.

Therefore, claims 1 through 32, are Allowed for the reasons the claimed invention are distinct from the prior art searched and of record neither anticipates nor suggests the claimed invention alone or in combination.
